

E-Commerce & Web Dev for Online Sneaker Distributor

PROJECT DETAILS

 E-Commerce Development

 May 2018 - Dec 2019

 \$200,000 to \$999,999

“
"The best part about working with SapientPro was their energy."

PROJECT SUMMARY

SapientPro developed an e-commerce website for a high fashion clothing seller. They added several features and used various technologies to produce the site in 10 languages.

PROJECT FEEDBACK

The delivered work made for a satisfying experience. SapientPro enabled quick changes and was open to all feedback on their work. Their deep expertise in the industry made them a great partner and a likely choice for future similar projects.

The Client

Introduce your business and what you do there.

I am the COO of Footshop. We are a big online e-commerce player that sells sneakers and high fashion clothing.

The Challenge

What challenge were you trying to address with SapientPro?

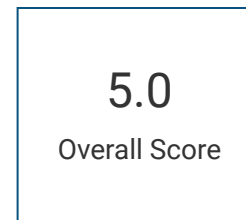

We needed a team to help us with e-commerce and web development. We needed to increase our development team because we grew very quickly. We wanted new features and to stabilize our website and system.

 **Peter Topor**
COO, Footshop

 **Prague, Czech Republic**

CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

What was the scope of their involvement?

SapientPro worked on our e-commerce and website development needs. They produced new features and the customer-facing side of the platform. Their team used a variety of technologies including PHP, Elasticsearch, and RabbitMQ. They also created the site in 10 languages.

What is the team composition?

We worked with six people from their team.

How did you come to work with SapientPro?

I found them through an online search, so we communicated through an initial email and a Skype call. After that, I went to Ukraine to meet with them. I chose their team because the communication went great with the owner and they had a good knowledge of technology.

How much have you invested in them?

We spent \$4,000 for each developer.

What is the status of this engagement?

We worked with them from May 2018–December 2019. We're building our own internal team so we stopped our collaboration.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

We had a very good experience with them. Their knowledge makes them a great candidate for another e-commerce project, so I've recommended them for others.

How did SapientPro perform from a project management standpoint?

We managed the project internally. We used Slack, Jira, Zoom, and GitLab.

What did you find most impressive about them?

The best part about working with SapientPro was their energy. Their young team and willingness to do new things made them great. They were good workers and were always looking to improve quickly.

Are there any areas they could improve?

Adding more proactive design features would be great.

Do you have any advice for potential customers?

It's important to have good internal project management to manage their team for longer-term projects.
